Using promise	Using async and await

function getdata(){
 	
fetch("https://dummy.restapiexample.com/api/v1/employees")
    .then((result)=>{
      if(result.status===200 && result.ok)
      console.log(result);
    return result.json()
    }).then((respone)=>{
      console.log(respone.data)
    }).catch((error)=>{
      console.log(error)
    })
    }
	const getdata=async ()=>{
	var result =await fetch((https://dummy.restapiexample.com/api/v1/employees)
	  if(result.status===200 && result.ok){
	    var response=await result.json();
	    console.log(response);// {status, data,message}
	    console.log(response.data);
	  }else{
	    console.log("error occurred",result.ok)
	  }
	}
